

```
$text = preg_replace("/ /", " ", $text); // 5 spaces between words (or replace "" with " ");
$text = preg_replace("/(\w)\B/", "\1 ", $text); // 3 spaces between letters (or replace "" with " ")
$text = preg_replace("/ /", " &nbsp;", $text); // replace " " with " &nbsp;"
$text = preg_replace("\n/i", "\n", $text); // replace nextlines with breaks
return $text;
}
?></div>
```

Capitalizing Hyphenated Names using str_replace and ucwords

To capitalize both halves of a hyphenated \$last_name variable, you can use the following:

```
<?php function ucwordsHyphen($last_name){
    return str_replace('-',ucwords(str_replace('-', '$last_name')));
}
?>
<?php $last_name = ucwordsHyphen(strtolower($record['last_name'])) ; ?>
```

Then where you want to display the last name:

```
<?php echo $last_name ?>
```
