SPECIAL FIELD NAMES - Aug 1st, 2010

These "special" fields can add functionality to your sections. Here's the list so you won't have to look for them.

Fieldname - Editable -Description

createdDate - Not editable - Automatically stores the date the record was first created

createdByUserNum - Not editable - Automatically stores the 'num' of the user who created the record. This value is also used to identify the 'owner' of the record.

updatedDate - Not editable - Automatically stores the date the record was last updated

updatedByUserNum - Not editable - Automatically stores the 'num' of the user who last updated the record.

publishDate - Editable Date Field - Record won't be displayed on website before this date. This allows users to prepare content in advance and have it appear on a certain date and time.

removeDate Editable Date Field - Record won't be displayed on website after this date. This allows users to have content automatically "expire" from website after a certain date and time.

neverRemove Editable - Checkbox - This checkbox field indicates that "removeDate" should be ignored. This lets users have some records that expire (are hidden) after a certain date and other records that never expire.

hidden - Editable Checkbox - This checkbox field indicates that the record should be not be displayed on the website. This lets users temporarily make records visible or not.

dragSortOrder - Editable - This field allows the user to drag records in the section editor record list to change their order. Just create this field and add it as the first entry of "ListPage Fields" and "Order By" to enable this functionality.
