## SAVE AND COPY FUNCTION FOR EMAIL TEMPLATES - Jan 30th, 2023

CMSB user Codee asked, "What's the possibility, and probability, that the Email Templates section of CMSB have the "Save and Copy" function such as the section editors have? Sometimes it would be great to be able to do a copy from an already built one and then just remove or change a few pieces, instead of starting from scratch for each one."

Daniel from Interactive Tools came up with a simple fix. He said, "Here's a patch you can add to saveAndCopy.php to enable it; on line 21 (in version 3.57) change this:

```
$addButton = isset($menuType) && ($menuType == 'multi' || $menuType == 'category') && ($action == 'add' || $action == 'edit');
```

to this:

```
$addButton = isset($menuType) && ($menuType == 'multi' || $menuType == 'category' || $tableName == '_email_templates') && ($action == 'add' || $action == 'edit');
```
