AUTOMATICALLY HIDE AND SHOW RECORDS BY DATE RANGE - Aug 2nd, 2010

You can automatically have records show and be hidden with the special fields 'publishDate' and 'removeDate'. You'll want to create date fields for those.

Once that's done, your list should only show records within the date range, but if you only want to show the first matching record, add this to your viewer code

```
list($yourRecords, $yourDetails) = getRecords(array(  
    'Table name' => 'yourTable',  
    // Insert This Code  
    'limit'      => '1',  
    // End of Insert  
));
```
