## ITEMS FROM A SINGLE RECORD EDITOR NOT SHOWING ON MULTI RECORD DETAIL PAGES - Aug 3rd, 2010

I had an image that came from a single record that I wanted to appear on my details pages from a multi record viewer. It showed up on the first record in the list but gave me an error saying that the argument supplied for foreach() was invalid for other records.

Dave had an insight, He said:

Try removing this line from the single page call in the details page header :

```
'where' => whereRecordNumberInUrl(1),
```

It worked like a charm.
